

JavNat-“DIY”

Natural/Adabas to Java/RDBMS

No “suits”, no pressure – just ROI!

In today’s uncertain economic times, CIOs are demanding cost effective, flexible solutions which can be implemented with a minimum of complexity.

JavNat-“DIY”™ provides just such a solution for “Do-it-Yourself”, self-reliant, Natural™/Adabas™ users wishing

to migrate to strategic technology alternatives such as Java and a relational database.

Offering a simple flexible, low cost, “try-before-buy” pricing model, JavNat-“DIY” provides high powered technology to deliver a fast, low risk, high quality automated migration of Natural/Adabas applications to a functionally equivalent Java/RDBMS implementation.

JavNat-“DIY” migrations enable a substantial reduction in software licensing costs as well as a wide choice of lower cost hardware platforms.

For additional technical and implementation details see the downloads at: www.fbda.ca/DIY

The Bottom Line: JavNat-“DIY” has this simple **“try-before-buy”** pricing schedule that allows you to fully evaluate the solution against your technical, human resource and cost parameters before making a significant financial commitment.

Item	Amount	Terms
JavNat - initial License Fee	\$25,000.00	Payable on delivery of the Discovery aNd Analysis (DNA) deliverables. Satisfaction guaranteed or “no questions asked” refunds.
JavNat - production License Fee	\$15,000.00 per 100 KLOC	Minimum \$15,000 on contract execution. Balance pro-rata on Quality Assurance Review (QAR) and delivery of Java source code. Discounts above 1 MLOC.
Ad-hoc Consulting by Certified “JavNat Migration Specialist”	\$200 per hour	All “pre-DNA delivery” consulting activities are included in the Initial License Fee. All “post-DNA delivery” consulting activities at ad-hoc rates.
Run-time software maintenance	Nil	We provide a perpetual, royalty free, source code license to run time components. Support after 12 month warranty is at ad-hoc consulting rates.

The fine print:

- DNA deliverables include extensive HTML source code analysis reports, **complete RDBMS DDL**, and **baseline conversion to Java of all customer supplied Natural source code**.
- JavNat pricing **includes data migration tools** for automated production data migration (some exceptions apply).
- FBDA will provide customer full access to all pre-existing FBDA documentation, case studies and best of breed integration, security and printing solutions at no additional cost. Additional solutions at ad-hoc consulting rates.
- FBDA warrants that JavNat will produce a functionally equivalent Java/RDBMS application. Oracle, DB2 and MySQL are supported at this time. Contact FBDA for a quote on other RDBMSs.
- FBDA warrants against defects in translation for a period of 12 months after production deployment.
- Source code re-processing at no cost for warranty items. Source code re-processing for customer related source code defects will be charged at ad-hoc consulting rates.
- Customer agrees to maximize use of electronic communications such as email, Skype, Webex, GoToMyPC, VPN, Mantis, Wiki, ftp and similar technologies to minimize costs.
- FBDA is responsible for all remediation, compilation and QAR of generated Java code.
- Customer is responsible for all functional test and debug, JCL or script conversion, security, printing, and System Integration & Test activities. FBDA mentoring and consulting assistance at ad-hoc consulting rates.
- Offer does not apply to Natural Web™, Construct™, Natural Windows™ dialogs, or Predict Case™ applications.
- Offer is for “Software Factory” service. Contact FBDA for customer site options and pricing.
- Have a great day and welcome to the future!
